

- Portico would be in Seward Wednesday, July 7, with a presentation at the IMS Rae Building from 7-9:00 pm. The public was invited.
- DOT notified the Nash Rd. project would be advertised in October for reconstruction next year, and the 0-8 mile project would go to construction next year also.
- Three cruise ships would be in town on Wednesday all at one time.
- Shealy requested a work session be scheduled to discuss business licenses. Administrative hearings were currently being scheduled, and he needed possible guidance.

In response to council questions, Shealy stated the Growth Company wanted 50% payment today, and a report should be coming soon on their job re-classification assessment. He would also speak with DOT on the speed limit by the three bridges being lowered to 35 mph.

Other Reports, Announcements and Presentations.

Requested Seward participate in a "Bear Safe Community" presented by Larry Lewis, Department of Fish and Game.

Presentation by Architect Gary Peterson on the New City Shop Concept and Design.

Citizens' comments on any subject except those items scheduled for public hearing.

Patty Barnes wanted to know what areas were being annexed in the Bear Lake area. She was advised of the upcoming work session and told that was an unknown so far.

Marilyn Sutherland, spoke in favor of Resolution 2004-75. She pointed out there were a number of Seward structures on the national historic register and hoped the Jesse Lee Home could be restored. Sutherland thought promoting the preservation of Seward's history was a benefit to residents and visitors alike. She thanked the commission and council for their foresight on historic issues for the community.

Tylan Schrock, coined a new term of 'nimby' (not in my back yard), and spoke in opposition to the North Forest Acres levee and road project. He did not know why the plan had changed but the Corps was now going to let the water go through the levee. He asked council to find an opportunity to get the creek alignment that the citizens' had originally asked for. Since this levee would be within 150-200 feet of homes, he wanted the City to build the right project.

Approval of agenda and consent agenda
